NEOPRENE RUBBER SHEET

Neoprene is a versatile, general-purpose rubber offering a balanced combination of performance characteristics across a wide range of environments.

Key Benefits:

- Excellent resistance to oils, greases, & chemicals
- Strong weathering and ozone resistance for outdoor use
- Good temperature stability and flexibility
- Reliable sealing and insulation properties
- Durable in marine and industrial environments

Neoprene is ideal where a multi-purpose rubber is required, especially in applications exposed to both environmental conditions and moderate chemical contact.
Roll size 1200mm x 10metres Thickness Available : 1.5mm, 3mm, 4.5mm, 6mm, 9mm

EPDM RUBBER SHEET

EPDM is a high-performance rubber specifically designed for outdoor and weather-exposed applications.

Key Benefits:

- Outstanding resistance to UV, ozone, &weathering
- Excellent performance in extreme temperatures (hot and cold)
- Highly resistant to water, steam, & mild chemicals
- Long service life with low maintenance requirements
- Good electrical insulation properties

EPDM is the preferred choice for external applications, sealing, and environments where long-term durability against the elements is critical.
Roll size 1200mm x 10metres Thickness Available : 1.5mm, 3mm, 4.5mm, 6mm

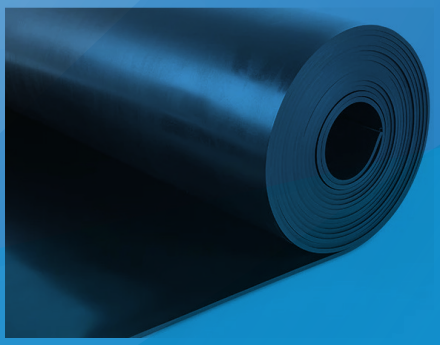

NITRILE (NBR) RUBBER SHEET

Nitrile rubber is engineered for environments involving oil, fuel, and hydrocarbons.

Key Benefits:

- Superior resistance to oils, fuels, & petroleum-based fluids
- Strong abrasion and wear resistance
- Maintains integrity in industrial & mechanical applications
- Good temperature performance in controlled environments
- Reliable for gaskets, seals, & automotive uses

Nitrile is the best solution where oil resistance is critical, making it widely used in automotive, mining, and heavy industry applications. **Roll size 1200mm x 10metres**
Thickness Available : 1.5mm, 3mm, 4.5mm, 6mm

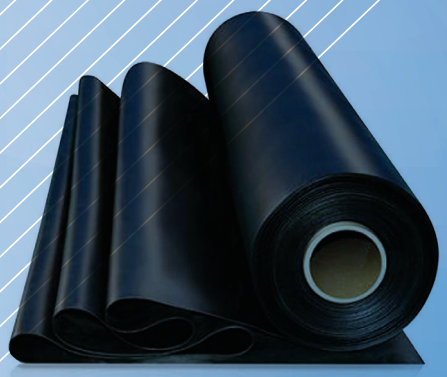

SHEET RUBBER STRIPS

INSERTION RUBBER

- **SIZES AVAILABLE:** 1.5mm, 3.0mm, 4.5mm, 6.0mm, 9.5mm.
- AVAILABLE IN NATURAL PLY FOR EACH THICKNESS.
- TO SUIT EVERY REQUIREMENT.
- FABRIC REINFORCED TO IMPROVE TEAR RESISTANCE.

ROLL SIZE :

- 1200mm x 10mtrs
- 1500mm x 10mtrs

INSERTION RUBBER STRIPS

Natural Insertion rubber strips are fabric-reinforced rubber strips offering good tear resistance, dimensional stability and flexibility for general-purpose industrial sealing, lining and protection applications. They are commonly used for sealing edges, wear protection strips, gaskets, protective barriers and isolation strips across fabrication, transport and equipment applications.

Available in a range of thicknesses and widths, these strips can be supplied in standard sizes or custom cut to suit specific requirements

Thickness (mm)	Available Widths (mm)
1.5 mm	50, 75, 100, 150, 200, 250, 300
2 mm	50, 75, 100, 150, 200, 250, 300
4 mm	50, 75, 100, 150, 200, 250, 300
6 mm	50, 75, 100, 150, 200, 250, 300
9 mm	50, 75, 100, 150, 200, 250, 300
