SKIRTING RUBBER STRIPS

Skirting rubber is a cost-effective rubber strip designed for basic conveyor skirting and sealing applications in material handling systems. It provides a simple barrier to help limit material spillage and dust at transfer points and chute openings.

Intended for light to medium-duty use, this skirting rubber is suitable for routine maintenance and economical replacement of worn skirting. Easy to install and service, it offers practical performance for operations where budget and availability are the primary considerations.

Thickness (mm)	Available Widths (mm)
6 mm	75, 100, 150, 200, 250, 300
9 mm	75, 100, 150, 200, 250, 300

Thickness (mm)	Available Widths (mm)
12 mm	75, 100, 150, 200, 250, 300
16 mm	75, 100, 150, 200, 250, 300
